Bauer Solutions Client Onboarding Guide

Welcome to Bauer Solutions

Welcome to Bauer Solutions. We are excited to help simplify your bookkeeping, automate your accounting processes, and deliver clear financial reporting that helps you make smarter business decisions.

This onboarding guide outlines the steps required to connect your systems, automate document collection, establish reporting preferences, and activate recurring ACH billing.

> Goal: Build a fully connected bookkeeping system that minimizes manual work, reduces errors, and provides timely financial visibility.

Step 1: Accounting and Banking Connections

QuickBooks Online Accountant Access

1. Log in to QuickBooks Online.
2. Navigate to **Settings** → **Manage Users** → **Accounting Firms**.
3. Invite **lwayne@BauerSolutions.org** as an Accountant user.

Bank and Credit Card Connections

Please ensure all active business accounts are connected to QuickBooks Online.

Include:

- Business checking accounts
- Business savings accounts
- Business credit cards
- Business lines of credit (if applicable)

Navigate to: **Transactions** → **Bank Transactions** → **Link Account**

Merchant and Payment Processor Connections

If applicable, connect:

- Stripe
- PayPal
- Square
- Shopify
- Other merchant processors

Direct integrations help automate revenue matching and reduce manual bookkeeping time.

ACH Authorization and Billing Setup

To prevent payment delays and eliminate collection follow-up, Bauer Solutions requires ACH payment information during onboarding.

Please provide:

- Bank name
- Routing number
- Account number
- Authorized signer name
- Billing contact information

ACH authorization will be established during onboarding, so recurring monthly service fees can be processed automatically beginning on Day 1.

Step 2: Receipt and Document Automation

Activate Your Document Portal

You will receive an invitation to either:

- Dext
- Hubdoc

Create your account immediately upon receiving the invitation.

Install the Mobile App

Download the corresponding mobile app and use it to capture:

- Receipts
- Fuel purchases
- Material purchases
- Vendor invoices
- Other business expenses

Configure Invoice Forwarding

You will receive a dedicated document intake email.

Examples:

- clientname@dext.cc
- clientname@hubdoc.com

Configure Gmail or Outlook rules to automatically forward invoices and statements.

Recommended vendors include:

- Utilities

- Internet providers
- Adobe
- Google Workspace
- Amazon Business
- Software subscriptions

Connect Supplier Accounts

Where available, connect supplier portals so statements and receipts are pulled automatically.

Common suppliers include:

- Amazon Business
- Office supply vendors
- Fuel card providers
- Equipment suppliers

Step 3: Financial Reporting Setup

Chart of Accounts Standardization

A brief onboarding meeting will be scheduled to review your existing bookkeeping structure.

During this meeting we will:

- Review existing accounts
- Consolidate duplicate accounts
- Create reporting categories
- Build a standardized chart of accounts

Define Key Metrics

Choose which business metrics you would like to highlight on your reporting dashboard.

Examples include:

- Monthly cash flow
- Cash runway
- Gross profit margin
- Revenue by customer type
- Labor costs
- Equipment costs
- Net income trends

Client Responsibilities

The Zero-Chase Policy

To maintain efficient service and predictable pricing, clients are expected to upload supporting documentation on time.

If more than **five (5) missing receipts** require manual follow-up during a month, a **$50 administrative surcharge** may be added to that month's invoice.

No Personal Transactions

Please avoid using personal accounts for business activity.

Mixing business and personal transactions:

- Slows processing
- Reduces reporting accuracy
- Creates additional reconciliation work

Additional cleanup fees may apply when extensive personal transactions require separation.

Scope and Account Limits

Each engagement includes a designated number of connected bank and credit card accounts.

Additional accounts may incur additional monthly service fees.

One-Time Cleanup and Onboarding Fee

For businesses whose books are behind, Bauer Solutions performs a complete account review and cleanup before recurring monthly service begins.

The cleanup fee is generally:

1.0x to 1.5x the selected monthly service tier

This service may include:

- Catch-up bookkeeping
- Historical transaction categorization
- Bank reconciliations
- Chart of accounts redesign
- Opening balance corrections

Service Tier Reference

Tier	Monthly Transactions	Max Accounts	Included Services	Monthly Investment
Starter	Under 50	1-2	Automated bank feeds, reconciliations, standard financial statements	$250 – $350
Growth	50-150	Up to 4	Dext/Hubdoc integration, receipt automation, bank rules, monthly reporting	$450 – $650
Scale & Advise	150-300	Up to 6	Advanced automation, live cash flow dashboard, monthly strategy review	$750 – $1,200

Final Checklist

Before your onboarding is complete, please verify:

- QuickBooks Accountant access granted
- All bank accounts connected
- All credit card accounts connected
- Merchant processors linked
- Dext or Hubdoc account activated
- Mobile app installed
- Invoice forwarding configured
- ACH information submitted
- Onboarding call scheduled
- Reporting goals communicated

Thank you for choosing Bauer Solutions.
